Description of Medical Conditions

This file contains questions such as have DOC ever told you that you have arthritis, congestive heart failure, coronary heart disease, angina pectoris, heart attack, stroke, emphysema, thyroid problem, chronic bronchitis, liver condition, weak/failing kidneys, cancer or malignancy, anemia, hepatitis B or C, and weak bones or osteoporosis.

Eligible Sample

Sample person (SP) participants in the survey who are 6 years old or older. Please refer the Analytic Guidelines for more information.

Interview Setting and Mode of Administration

This questionnaire was administered in the home using computer assisted interviewing (CAI) and computer assisted personal interviewing (CAPI) methods.

For NHANES Mobile MEC Exam (MME) questionnaire is available in the NHANES website.

Quality Assurance & Quality Control (QA/QC)

The QA/QC protocol is designed with an eye to consistency, ease of training, and ease of data processing. Interviewers are trained to read questions as they appear on the screen, to probe as directed, and to enter the data as they hear it. The computer does the rest. Ranges, skips, and consistency checks are built into the instrument. Interviewers receive a minimum of 40 hours of classroom training followed by supervised field work. Quality control and quality assurance are ongoing throughout the survey year.

Analytic Notes

Survey Cycle Weights: Because the questionnaire was administered in a continuous fashion, the survey cycle weights should be used in analyses. Please refer to the Analytic Guidelines for more information.

The number of questionnaires varies by interview cycle because some questions were added or deleted from the survey. Please refer to the Survey Questionnaires for more information.

The number of questions may also change within the same year due to questions being added or deleted from the survey. Please refer to the Survey Questionnaires for more information.

Please refer to the NHANES website, Continuous and Data Analytic Guidance for further information on analytic guidance for continuous NHANES data.
